

## Lily Fields Home

### Sandcast Metalware

Made of eco-friendly, 100% recycled metals.

Will Never Tarnish

Contains No Lead

Safe for Food Service

Helps retain hot and cold temperatures

Safe in the oven up to 400 degrees

#### Care and Cleaning

To prevent stains, do not store foods for long periods of time.

After serving, wash with mild soap and water, and dry immediately.

Do not put in the dishwasher or soak in water.

The cutting action of a knife or fork will scratch the surface of any metal piece.

Sandcast metalware is made by a process of packing sand around a model, removing the model and pouring molten metal into the sand mold. When the metal cools, the sand is broken and the new piece is individually polished until it has a beautiful shine. Thus, each piece has its unique design, and a small pitting is normal, adding to the rich character of the item.
